

TOSHIBA BIPOLAR LINEAR INTEGRATED CIRCUIT SILICON MONOLITHIC

**TA8415P****STEPPING MOTOR CONTROLLER / DRIVER**

The TA8415P is general purpose unipolar stepping motor controller/driver, applicable to 3/4 phase motors and 1, 1-2, 2 phase excitation drive by initial setting of control terminals.

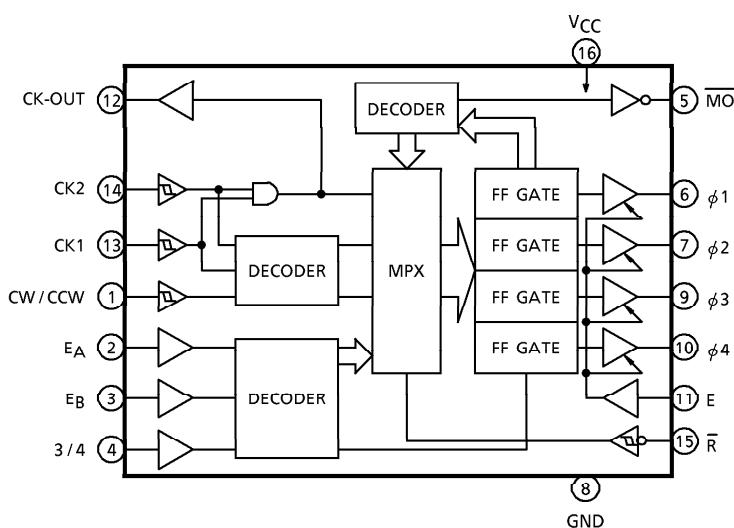

**FEATURES**

- 1 chip stepping motor controller/driver.
- 3 or 4 phase and 1, 1-2, 2 phase excitation drive are available.
- CW / CCW rotation and 1 clock or 2 clock drive are available.
- Hysteresis is provided with clock, CW / CCW, reset inputs for noise protection.
- Output enable, initial detect are available.
- Output current up to 400mA (MAX.)

- TOSHIBA is continually working to improve the quality and the reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to observe standards of safety, and to avoid situations in which a malfunction or failure of a TOSHIBA product could cause loss of human life, bodily injury or damage to property. In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent products specifications. Also, please keep in mind the precautions and conditions set forth in the TOSHIBA Semiconductor Reliability Handbook.
