### General Description

Aeroflex's ACT8503 is a radiation hardened, multi-chip 48 channel multiplexer MCM (multi-chip module) with ESD protection for use in space applications. All channel inputs have electrostatic discharge protection.

The ACT8503 has been specifically designed to meet exposure to radiation environments. The multiplexer is available in a 96 lead High Temperature Co-Fired Ceramic (HTCC) Quad Flatpack (QFP) and is guaranteed operational from -55°C to +125°C. Available screened in accordance with MIL-PRF-38534, the ACT8503 is ideal for demanding military and space applications.

**ACT8503 48 Channel Analog MUX Block Diagram**

## **Organization and Application**

The ACT8503 consists of three 16 channel muxes arranged as shown in the Block Diagram. The Address Bus and three Enable lines providing for 48 channels addressable by Bus A<sub>0</sub>~A<sub>3</sub>, in three 16 channel blocks, each block enabled separately. Each block connects the addressed channel to one output.

The ACT8503 design is inherently Radiation Hard due to the HS1840RH Multiplexers as well as Microsemi Corp. Transient Suppressors (Reference Microsemi MicroNotes Series 050 - page 14).

**NOTE:** It is recommended that all "NC" or "no connect pin", be grounded. This eliminates or minimizes any ESD or static buildup.
