## NTE7064 Integrated Circuit Bridge Driver for DC Motor Control

### **Description:**

The NTE7064 is an integrated circuit in a 7-Lead SIP type package designed for use as a bridge driver for brushed DC motor rotation control. Forward rotation, reverse rotation, stop, and braking operations are available. Typical applications include a loading and reel motor driver for VCR and tape deck, and any other consumer and industrial applications.

### **Features:**

- Output Current Up to: 1 Amp (Average), 3 Amp (Peak)
- 4 Function Modes (CW, CCW, STOP, and BRAKE) are Controlled by 2 Logic Signals Fed Into 2 Input Terminals
- Built-In Over Current Protection and Thermal Shut-Down Circuit
- Operating Voltage Range:  $V_{CC} = 6V$  to 18V

### **Absolute Maximum Ratings:** ( $T_A = +25^\circ C$ unless otherwise specified)
