

RoHS **Pb** **GREEN** **SP3050 Lead-Free/Green Series**

Description

The SP3050 integrates low capacitance rail-to-rail diodes with an additional zener diode to protect each I/O pin against ESD and high surge events. This robust device can safely absorb surge current per IEC61000-4-5 ($t_p=8/20\mu s$) without performance degradation and a minimum $\pm 20kV$ ESD per IEC61000-4-2. Their very low loading capacitance also makes them ideal for protecting high speed signal pins.
