

Features

- High bandwidth, high RF rejection filter array
- Six and eight channels of EMI filtering
- Utilizes *Praetorian*™ inductor-based design technology for true L-C filter implementation
- *OptiGuard*™ coating for improved reliability
- 15kV ESD protection on each channel (IEC 61000-4-2 Level 4, contact discharge)
- 30kV ESD protection on each channel (HBM)
- Better than 40dB of attenuation at 1GHz
- Maintains signal integrity for signals that have a risetime and falltime as fast as 2ns
- Chip Scale Package (CSP) features extremely low lead inductance for optimum filter and ESD performance
- 15-bump, 3.006mm x 1.376mm footprint Chip Scale Package (CM1451-06CS/CP)
- 20-bump, 4.006mm x 1.376mm footprint Chip Scale Package (CM1451-08CS/CP)
- Lead-free version available

Applications

- LCD and Camera data lines in mobile handsets
- I/O port protection for mobile handsets, notebook computers, PDAs, etc.
- EMI filtering for data phones in cell phones, PDAs or notebook computers
- Wireless handsets / cell phones
- Wireless Handsets
- Handheld PCs/PDAs
- LCD and camera modules

Product Description

The CM1451 is an inductor-capacitor (L-C) based EMI filter array with integrated ESD protection in CSP. The CM1450-06 and CM1450-08 are configured in 6 and 8 channel formats respectively. Each channel is implemented as a 5-pole L-C filter with the component values 9.5pF-17nH-9.5pF-17nF-9.5pF. The CM1451's roll-off frequency at -10dB attenuation is 500MHz. It can be used in applications where the data rates are as high as 200Mbps while providing greater than 35dB attenuation over the 800MHz to 2.7GHz frequency range. The device has ESD protection diodes on every pin that provide a very high level of protection for sensitive electronic components that may be subjected to electrostatic discharge (ESD). The ESD protection diodes connected to the filter ports safely dissipate ESD strikes of •15kV, exceeding the Level 4 requirement of the IEC61000-4-2 international standard. Using the MIL-STD-883 (Method 3015) specification for Human Body Model (HBM) ESD, the pins are protected for contact discharges at greater than •30kV.

This device is particularly well-suited for portable electronics (e.g. wireless handsets, PDAs) because of its small package and easy-to-use pin assignments. In particular, the CM1451 is ideal for EMI filtering and protecting data and control lines for the LCD display and camera interface in wireless handsets while maintaining the integrity of signals that have rise/fall times as fast as 2ns.

The CM1451 incorporates *OptiGuard*™, a coating that results in improved reliability at assembly. The CM1451 is available in a space-saving, low-profile Chip Scale Package with optional lead-free finishing.

Electrical Schematic

1 of n EMI Filtering + ESD Channels
(n = 6 for CM1451-06, 8 for CM1451-08, m=n/2)

* See Package/Pinout Diagram for expanded pin information.
