

Product Guide 2005

 **CATALYST**
SEMICONDUCTOR, INC.

catalyst semiconductor quality policy

Catalyst Semiconductor's Quality Policy is to provide customers with high quality, leading edge non-volatile memory based products. In addition to providing high quality products, Catalyst strives to promote customer satisfaction, emphasizes the prevention of non-conformances and continually pursues improvements in its company-wide operations.

green package program

Catalyst Semiconductor made the commitment in Q4 2002 to deliver volume production of lead-free, halogen-free "Green" package integrated circuits. Catalyst offers "Green" packages for its complete product offering of analog and mixed-signal ICs, as well as serial and parallel EEPROM memory. The "Green" Package Program is a total system solution encompassing lead plating, package compound and die attach epoxy technology.

Catalyst continues to meet the requirements of regulatory agencies world wide:

- Waste from Electrical and Electronics Equipment (WEEE)
- Japanese Ministry of International Trade and Industry
- Japan Electrical Insulating Materials Association
- European Union Directives

Founded in 1985, Catalyst Semiconductor, Inc. is headquartered in Sunnyvale, California. Catalyst is a leading supplier of high performance analog/mixed-signal solutions and nonvolatile memory products used in automotive, aircraft, telecommunications, computation, industrial and consumer markets. Catalyst designs and markets a broad range of analog/mixed-signal products such as White LED Drivers, DC-DC converters, GPI/O expanders, Digitally Programmable Potentiometers (DPP™), Microcontroller Supervisory circuits and other analog/mixed-signal products. Programmable products include Serial and Parallel EEPROMs with I²C, SPI and Microwire interfaces, as well as NVRAM and low density Flash Memories. Typical applications include LCD displays, digital cameras, cell phones, automotive instrumentation, modems, wireless LANs, network cards, DIMM modules, digital satellite box receivers, set-top boxes and Internet routers. Catalyst's Quality Management System is ISO 9001:2000 certified. For additional information about Catalyst Semiconductor, visit our website at: www.catsemi.com.

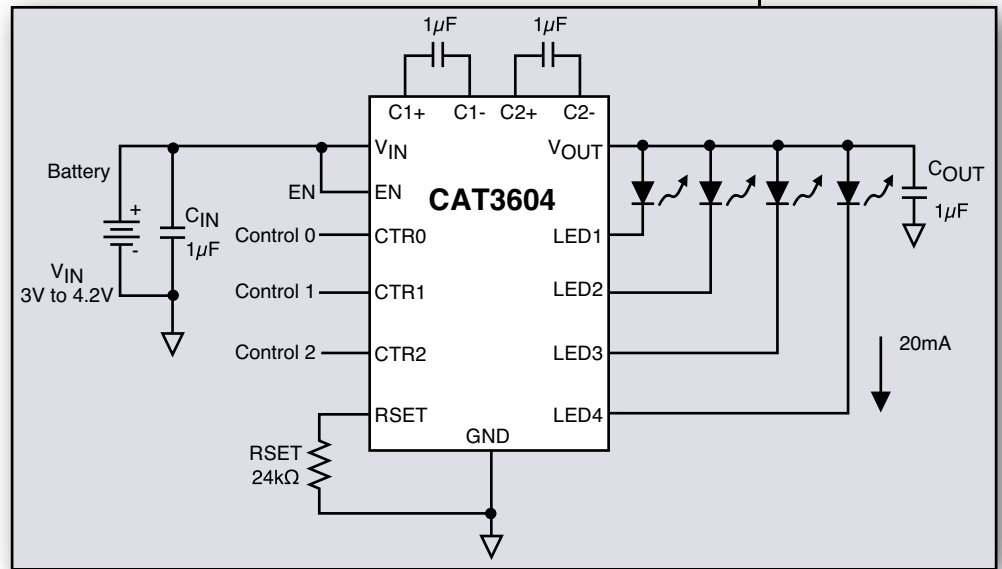

CAT3604 4-Channel Fractional Charge Pump LED Driver

Features

- automatically switches from 1x LDO mode to 1.5x boost mode
- inductor-less design minimizes EMI interference
- drives up to 4 Parallel LEDs at 30mA per channel
- very low input ripple and noise
- “zero” shutdown current extends battery life
- power efficiency up to 93%
- optimized for use with Lithium-Ion battery systems

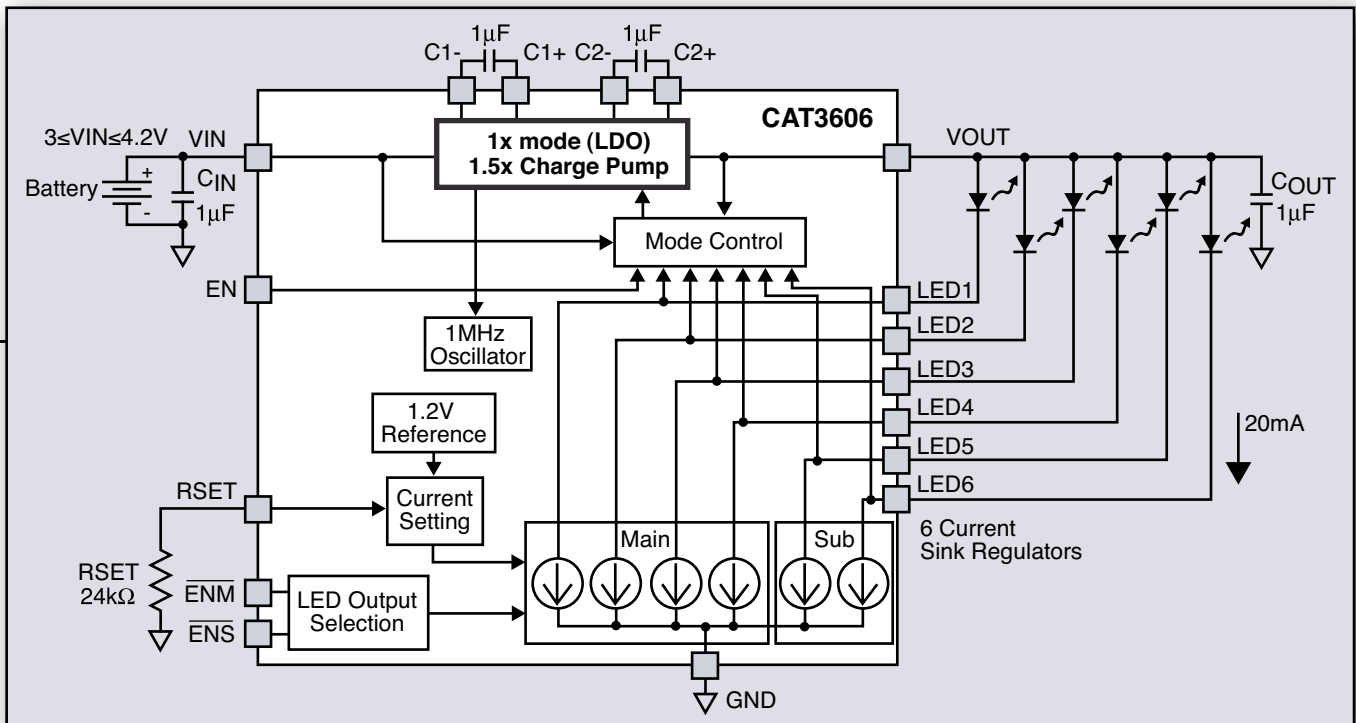

Package Information

- 16 pad TQFN (4x4mm, height 0.8mm max)

Featured Products

CAT3606 6-Channel Fractional Charge Pump LED Driver

Features

- | | | |
|--|---|--|
| <ul style="list-style-type: none"> ■ independent dimming and standby control for Main and Sub displays ■ automatically switches from 1x LDO mode to 1.5x boost mode ■ inductor-less design minimizes EMI interference | <ul style="list-style-type: none"> ■ drives up to 6 Parallel LEDs at 30mA per channel ■ very low input ripple and noise ■ “zero” shutdown current extends battery life ■ power efficiency up to 90% | <ul style="list-style-type: none"> ■ short circuit detect/disable on all channels ■ optimized for use with Lithium-Ion battery systems |
|--|---|--|

Package Information

- 16-pad TQFN (4x4mm, height 0.8mm max)

CAT4237
High Voltage CMOS Boost White LED Driver

Features

- drives 8 white LEDs in series from 3V
- low quiescent ground current 0.3mA
- power efficiency over 84%
- adjustable output current (up to 40mA)
- high-frequency 1MHz operation
- high voltage power switch
- shutdown current less than 1 μ A
- load fault protection against open-circuits
- tight line/load regulation

Package Information

- thin SOT23 5-lead (1mm max height)

CAT310
Automotive 10-Channel Serial Latched LED Driver

Featured Products

Features

- output drivers withstand load-dump transients up to 40V
- operates over automotive temperature range: -40 to +125°C
- drives 10 LEDs in parallel at 50mA per channel
- output channels can drive a combination of white or color LEDs
- serial output allows cascading of multiple CAT310's to drive greater than 10 LEDs
- operating voltage up to 17V
- simple LED pattern programming through the 10 MHz serial interface
- blank pin provides global on/off control of all LEDs
- under Voltage Lockout
- over Voltage Protection

Package Information

- 20-lead SOIC

PRODUCT LIST

Featured Products

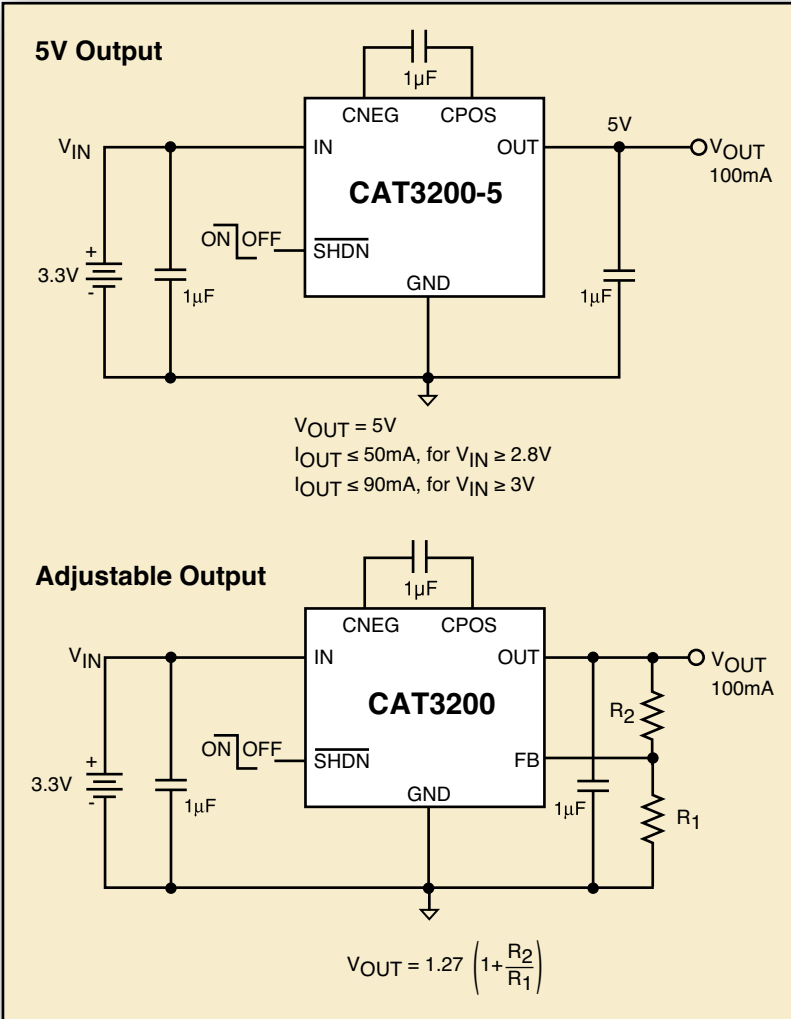

CAT3200/CAT3200-5
Low Noise Regulated Charge Pump DC-DC Converter

Features

- regulated output voltage
(5V fixed CAT3200-5, adjustable CAT3200)
- 100 mA output current
- fixed high operating frequency at 2 MHz
- input voltage operation down to 2.7 V
- low quiescent current (1.7 mA typ)
- low value external capacitors (1 μ F)
- low output ripple voltage, typical 30mV @ $C_{OUT} = 1 \mu$ F
- shutdown current less than 1 μ A
- foldback current overload protection
- soft start, slew rate control
- thermal overload shutdown protection

Package Information

- CAT3200 in MSOP-8
- CAT3200-5 in low profile (1mm thin) 6-lead TSOT23
- pin compatible with LTC3200 and LTC3200-5

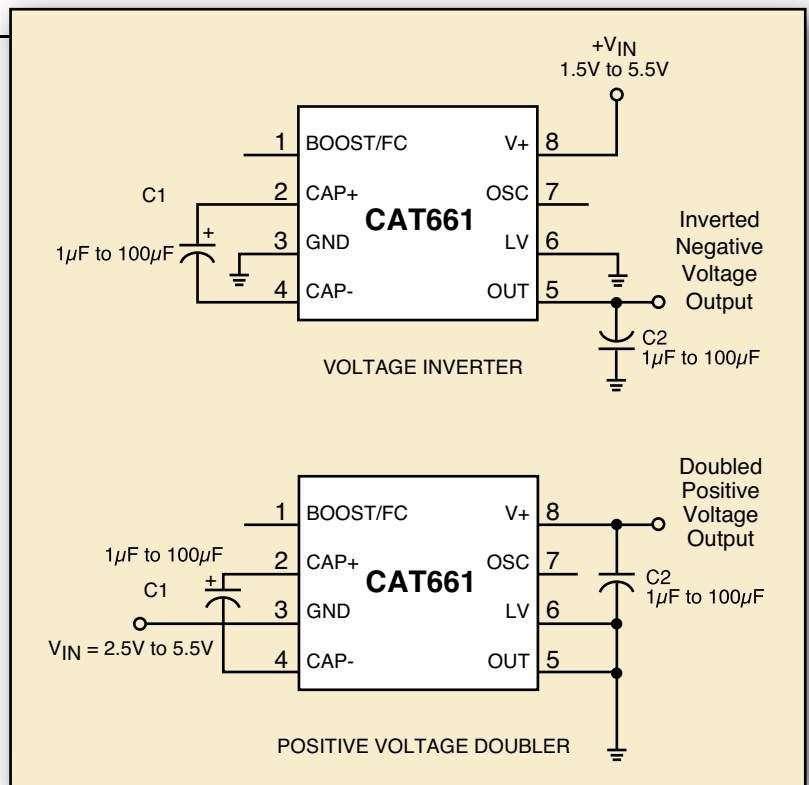

CAT661
100mA CMOS Charge Pump Inverter/Doubler

Features

- converts V_+ to V_- or V_+ to $2V_+$
- high power efficiency
- industrial temperature range
- low output resistance, 4 Ω typical
- low quiescent current
- pin-compatible, high-current alternative to 7660/1044
- selectable charge pump frequency
- 25kHz or 135kHz
- enables optimum external capacitors

Package Information

- 8-pin SOIC, DIP and 0.8mm thin 8-pad TDFN
- pin compatible with MAX660, LTC660 and LM2660

PRODUCT LIST

DC-DC CONVERTERS

Part Number	Operating Modes	Input Voltage	Ground Current	Output Current	Switching Frequency	Output Impedance	Internal Regulation	Packages (Pin Count) ¹

PRODUCT LIST

LOW VOLTAGE SHUNT REGULATORS

Part Number	Reference Voltage (V)	Reference Voltage Across Temp ²		Initial Accuracy	Packages (Pin Count) ¹	
		Min	Max		SOT23 (TP, TB, GTB)	TO-92 (TN, TL, GTL)
CAT102	0.6	0.588	0.612	±1%	5	
CAT431L	1.24	1.228	1.252	±0.5%	3, 5	3

Notes:

1. Available in standard and “green” packages.
2. Operating temp range of -40°C to +85°C with junction temperatures from -40°C to +105°C.

All product documentation can be found on the Catalyst Semiconductor web site at www.catsemi.com.

CAT809 / CAT810 / CAT811 / CAT812

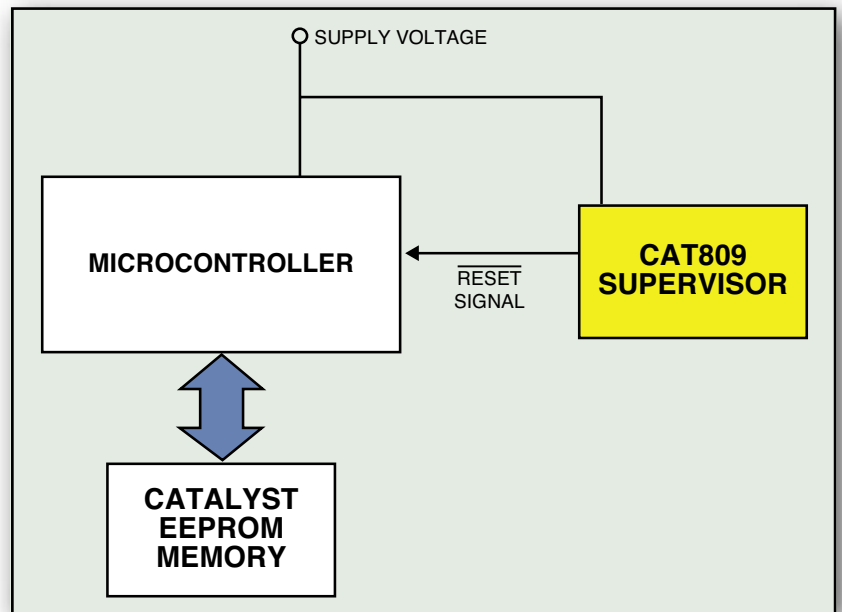

3-Pin/4-Pins Microprocessor Power Supply Supervisors

Features

- 6 μA power supply current
- pin compatible with MAX809, 810, 811 and 812
- offered in two output configurations:
 - push-pull RESET, active LOW (CAT809 and CAT811)
 - push-pull RESET, active HIGH (CAT810 and CAT812)
- power supply transient immunity
- manual reset (MR) (CAT811 / CAT812 only)
- precision monitoring of 5.0 V, 3.3 V, 3.0 V and 2.5 V power supplies
- reset valid down to $V_{CC} = 1.0V$
- custom reset threshold voltage offered

Package Information

- 3-pin SOT23 (CAT809 / CAT810)
- 3-pin SC70 (CAT809 / CAT810)
- 4-pin SOT143 (CAT811 / CAT812)

Featured Products

CAT1232LP

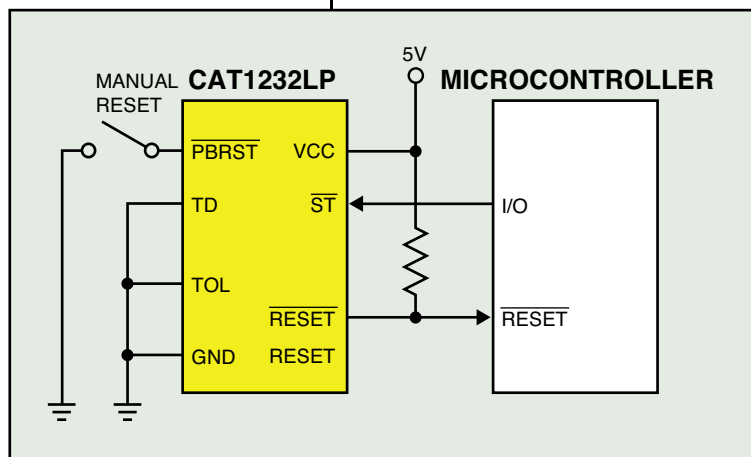

5 V μP Supply Voltage Monitor and μP Reset Circuit

Features

- power-up, power-down and brownout protection
- watchdog timer
 - selectable watchdog period
 - 150ms, 600ms or 1.2 sec
- selectable reset voltage tolerance
 - 5% or 10%
- two reset outputs
 - active low, open-drain reset output
 - active high, push-pull reset output
- debounced manual push-button reset
- pin compatible with DS1232 and DS1232LP

Package Information

- 8-pin DIP
- 8-pin & 16-pin SOIC
- 8-pin MSOP

CAT9554 / CAT9554A — 8-bit I²C and SMBus I/O Port Expander with Interrupt

CAT9555 — 16-bit I²C and SMBus I/O Port Expander with Interrupt

Features

Package Information

- | | | | |
|--|---|----------------------------------|---|
| ■ 2.3V to 5.5V operation | ■ drive LEDs by sinking 25mA current | ■ individual I/O configuration | ■ 16-pin SOIC (CAT9554), 24-pin SOIC (CAT9555) |
| ■ -40°C to +85°C operation | ■ active low interrupt output | ■ internal power-on reset | ■ 16-pin TSSOP (CAT9554), 24-pin TSSOP (CAT9555) |
| ■ 400kHz I ² C bus compatible | ■ cascadable up to 8 devices-16 devices (CAT9555) | ■ noise filter on SDA/SCL inputs | ■ 16-pad TQFN (4 x 4 mm) (CAT9554), 24-pin TQFN (4x4mm) (CAT9555) |
| ■ 5V tolerant I/Os | ■ high drive capability | | ■ pin compatible with PCA9554/9554A and PCA9555 |

Applications

- RAID systems
- servers
- test equipment
- fan control

CAT9534 / CAT9535

8-bit / 16-bit I²C and SMBus Low Power I/O Port expander with Interrupt

Features

Package Information

- | | | |
|--------------------------------|----------------------------------|---|
| ■ low stand-by current | ■ active low interrupt output | ■ 16-pin SOIC & 16-pin TSSOP (CAT9534), 24-pin SOIC (CAT9535) |
| ■ 0 to 400 kHz clock frequency | ■ internal power-on reset | ■ 16-pad TQFN (4 x 4 mm) (CAT9534), 24-pin TQFN (4x4mm) (CAT9535) |
| ■ 2.3 V to 5.5 V operation | ■ noise filter on SCL/SDA inputs | ■ pin compatible with PCA9534 |
| ■ 5 V tolerant I/Os | | |

Visit our website for samples, data sheets, and additional product information.

CAT9532 — I²C Interfaced 16-bit LED Dimmer

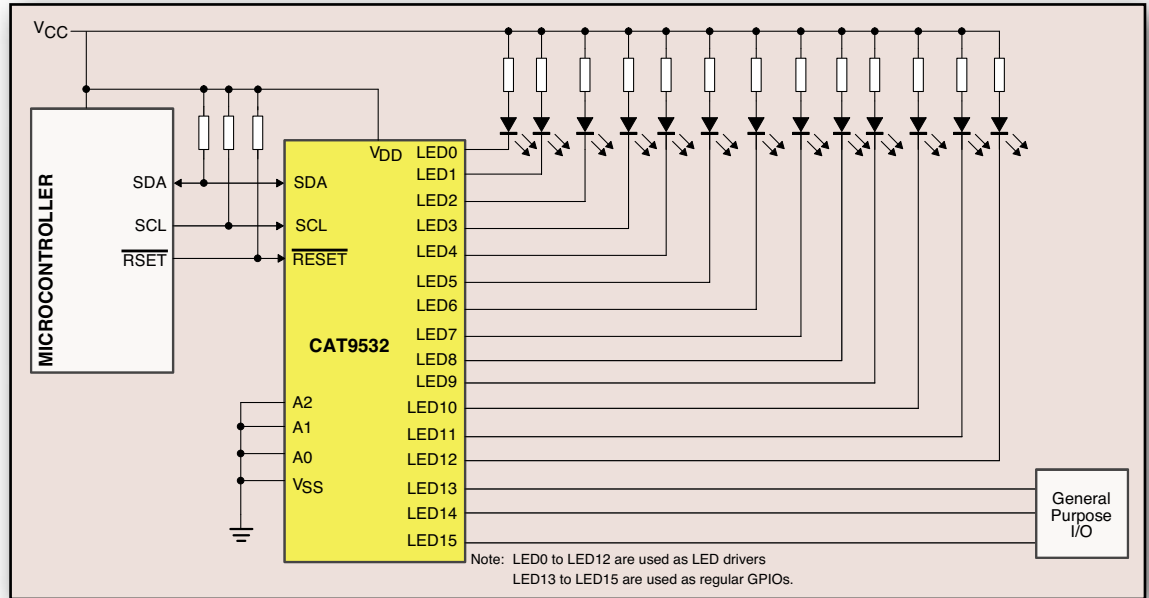

CAT9552 — I²C Interfaced 16-bit LED Blinker

Features

- 256 discrete brightness steps for easy LED dimming and color mixing
- two programmable blinking rate between 0.625 sec and 1.6 sec for CAT9532; 0.02sec and 6.4 sec for CAT9552
- eliminates repeated commands to turn on/off LEDs, reducing I²C traffic
- drives up to 16 LEDs; any bit that is not used to drive an LED can be used as a GPIO
- 25mA sink current per bit (max 200mA per device)
- each port can be individually turned on, off, or programmed to blink
- during power-up or when a manual reset (hardware reset) is asserted, all outputs are set to off-mode
- built in noise filter for SDA/SCL inputs
- 0-400KHz clock frequency

Applications

- LED dimming
- LCD backlighting
- cellular phones

PRODUCT LIST

I²C INTERFACE I/O EXPANDERS

Part Number	I/Os	Cascadable	Operating Voltage	INT/ RESET	Internal I/O Pullups	LED Blink/ PWM	Packages (Pin Count) ¹

Notes:

1. Available in standard and "green" packages.
2. CAT7311 is pin compatible with the MAX7311. All other products are pin compatible with Philips (replace PCA with CAT to order).
3. 300 mil wide

All product documentation can be found on the Catalyst Semiconductor web site at www.catsemi.com.

CAT5120 / CAT5121 / CAT5122
16-Tap MiniPot™ Digitally Programmable Potentiometers
with Increment/Decrement Interface

Features

- 0.3µA ultra-low supply current
- 2-wire up/down serial interface
- resistance values: 10kΩ, 50kΩ and 100kΩ
- single-supply operation: 2.7V to 5.5V
- glitchless switching between resistor taps
- power-on reset to midscale

Package Information

- 5- and 6-pin SC70 and SOT23 packages

Featured Products

CAT5259
256-Tap Quad Digitally Programmable Potentiometer

Features

- four linear taper digitally programmable potentiometers
- end-to-end resistance 50kΩ or 100kΩ
- low wiper resistance, typically 100Ω
- non-volatile memory storage for up to four wiper settings for each potentiometer
- automatic recall of saved wiper settings at power up
- 2.5V to 6.0V volt operation
- standby current less than 5µA

Package Information

- 24-pin SOIC & TSSOP packages

Notes:

1. Available in standard and "green" packages.
2. Temp Range - C is 0°C to 70°C; I is -40°C to +85°C

All product documentation can be found on the Catalyst Semiconductor web site at www.catsemi.com.

2-kb I²C Serial EEPROM, Serial Presence Detect

Features

- 1.7 to 5.5 volt operation
- 16-byte page write buffer
- 100 year data retention
- 400 KHz I²C bus compatible*
- 1,000,000 program/erase cycles
- hardware write protection for entire memory
- industrial and extended temperature ranges
- low power CMOS technology
- permanent and reversible software write protection for lower 128 bytes
- schmitt trigger on SCL and SDA inputs

Package Information

- 8-pin DIP package
- 8-pin TSSOP package
- 8-pin SOIC package
- 8-pad TDFN (2x3 mm) package

Featured Products

CAT24C208

8k (1k x 8) -Bit Dual Port Serial EEPROM for VESA Plug and Play Applications in LCD Projectors and Monitors

Features

- 3.0 to 5.5 volt operation
- 16-byte page write buffer
- 100 year data retention
- 400 KHz I²C bus compatible*
- 1,000,000 program/erase cycles
- hardware write protection for entire memory
- industrial and extended temperature ranges
- low power CMOS technology
- complies with VESA E-DID, E-DDC, DI-EXT and M1 specifications

Package Information

- 8-pin DIP package
- 8-pin MSOP package
- 8-pin SOIC package
- 8-pin TSSOP package

*Catalyst Semiconductor is licensed by Philips Corporation to carry the I²C Bus Protocol.

PRODUCT LIST
2-Wire Serial EEPROM Family

Part Number	Temp Range	Density (org)	ICC (Active/Standby)	Min Voltage/ Max Clock Frequency	Voltage Range	Package (Pin Count) ¹							
						DIP (P,L, GL)	SOIC		MSOP (R, Z, GZ)	SOT23 (TP, TB, GTB)	TSSOP (U, Y, GY)	TDFN

CUSTOMER SATISFACTION

The Catalyst customer satisfaction group is available to answer questions concerning orders and shipments. The toll-free number is 1.800.258.5991 (option #7). You may also send an email to customer.satisfaction@catsemi.com.

TECHNICAL SUPPORT

You may request technical assistance online. To contact our application staff, complete the technical support form available in the technical support section of our web site. The web site address is <http://www.catsemi.com/techsupport/form.html>. You may also use our toll-free technical support hotline at 1.800.258.5331 (option #6). Technical support is available during business hours, Pacific Time.

catalyst semiconductor product policies

LIMITED WARRANTY

Devices sold by Catalyst Semiconductor, Inc. are covered by the limited warranty and other limited provisions appearing in its Terms of Sale. Catalyst Semiconductor makes no warranty, express, statutory, implied, or by description regarding the information set forth herein or regarding the freedom of the described devices from patent or other intellectual property infringement. Catalyst Semiconductor makes no warranty of merchantability or fitness for any purpose. Catalyst Semiconductor reserves the right to discontinue production and change specifications and prices at any time and without notice. Catalyst Semiconductor, Inc. assumes no responsibility for the use of any circuitry other than circuitry it embodies in a Catalyst Semiconductor product.

LIFE-RELATED POLICY DISCLAIMER

Catalyst Semiconductor does not authorize use of any of its products as critical components in life support devices or systems without the express written approval of the President of Catalyst Semiconductor, Inc., as used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and whose failure to perform, when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
2. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

In situations where semiconductor component failure may endanger life, system designers using this product should design the system with appropriate error detection and correction, redundancy and backup features to prevent such an occurrence.

TRADEMARKS

Catalyst Semiconductor is licensed by Philips Corporation to carry the I2C Bus Protocol, Intelligent Programming, Quick Erase Programming and Quick-Pulse Programming are trademarks of Intel Corporation. Product names used in this publication are for identification purposes only and may be trademarks of their respective companies. Catalyst Semiconductor, Inc. reserves the right to make changes in the device or specifications described herein without notice. Information in this document is subject to change without notice.

DPP™, DPPs™, Power Miser™, ZERO Power™, DACpot™, MiniPot™ and EasyPRO™ are trademarks of Catalyst Semiconductor, Inc. Microwire™ is a trademark of National Semiconductor. I2C™ is a trademark of Philips. SPI™ is a trademark of Motorola.
