DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

SCOPE 1.1 Scope. This drawing describes device requirements for class B microcircuits in accordance with 1.2.1 of MIL-STD-883, "Provisions for the use of MIL-STD-883 in conjunction with compliant non-JAN devices". 1.2 Part number. The complete part number shall be as shown in the following example: 5962-89670 Case outline Lead finish per Drawing number Device type (1.2.2)MIL-M-38510 1.2.1 Device type. The device type shall identify the circuit function as follows: Circuit function Generic number Device type 0P490A Low voltage, micropower, quad operational amplifier 01 1.2.2 Case outlines. The case outlines shall be as designated in appendix C of MIL-M-38510, and as follows: Outline letter Case outline 0-1 (14 lead, .785" x .310" x .200"), dual in-line package C-4 (28-terminal, .460" x .460" x .100"), square chip package 3 1.3 Absolute maximum ratings. +1.6 V to +36 V ±0.8 V to ±18 V (-V - 20 V) to (+V + 20 V) Dual supply operation  $(V_S)$ -------Differential input voltage ------(-V - 20 V) to (+V + 20 V)Output short-circuit duration - - - - - - - - - - - -Continuous Storage temperature range - - - - - - - - - - - --65°C to +150°C +300°C -65°C to +150°C Lead temperature (soldering, 60 seconds)- - - - - - - -Junction temperature range (T<sub>J</sub>) ------Thermal resistance, junction-to-case  $(\theta_{JC})$  - - - - - Thermal resistance, junction-to-ambient  $(\theta_{JA})$ : See MIL-M-38510, appendix C Case C ------110°C Case 3 1.4 Recommended operating conditions. Single supply operation (GND to +V) - - - - - - - - -0 V to +36 V Dual supply operation  $(V_S)$  ------±18 V -55°C to +125°C Ambient operating temperature range  $(T_A)$ ------Source resistance  $(R_S)$ --------SIZE STANDARDIZED 5962-89670 Α MILITARY DRAWING **DEFENSE ELECTRONICS SUPPLY CENTER REVISION LEVEL** SHEET

BULLETIN

MILITARY

MIL-BUL-103

- List of Standardized Military Drawings (SMD's).

(Copies of the specification, standard, and bulletin required by manufacturers in connection with specific acquisition functions should be obtained from the contracting activity or as directed by the contracting activity.)

2.2 Order of precedence. In the event of a conflict between the text of this drawing and the references cited herein, the text of this drawing shall take precedence.

- 3. REQUIREMENTS
- 3.1 Item requirements. The individual item requirements shall be in accordance with 1.2.1 of MIL-STD-883, "Provisions for the use of MIL-STD-883 in conjunction with compliant non-JAN devices" and as specified herein.
- 3.2 <u>Design, construction, and physical dimensions</u>. The design, construction, and physical dimensions shall be as specified in MIL-M-38510 and herein.
  - 3.2.1. Terminal connection. The terminal connection shall be as specified on figure 1.
  - 3.2.2. Case outlines. The case outlines shall be in accordance with 1.2.2 herein.
- 3.3 Electrical performance characteristics. Unless otherwise specified herein, the electrical performance characteristics are as specified in table I and shall apply over the full ambient operating temperature range.
- 3.4 Electrical test requirements. The electrical test requirements shall be the subgroups specified in table II. The electrical tests for each subgroup are described in table I.
- 3.5 Marking. Marking shall be in accordance with MIL-STD-883 (see 3.1 herein). The part shall be marked with the part number listed in 1.2 herein. In addition, the manufacturer's part number may also be marked as listed in MIL-BUL-103 (see 6.6 herein).

- 3.7 Certificate of conformance. A certificate of conformance as required in MIL-STD-883 (see 3.1 herein) shall be provided with each lot of microcircuits delivered to this drawing.
- 3.8 Notification of change. Notification of change to DESC-ECS shall be required in accordance with MIL-STD-883 (see 3.1 herein).
- 3.9 <u>Verification and review.</u> DESC, DESC's agent, and the acquiring activity retain the option to review the manufacturer's facility and applicable required documentation. Offshore documentation shall be made available onshore at the option of the reviewer.
  - 4. QUALITY ASSURANCE PROVISIONS

1

- 4.1 Sampling and inspection. Sampling and inspection procedures shall be in accordance with section 4 of MIL-M-38510 to the extent specified in MIL-STD-883 (see 3.1 herein).
- 4.2 <u>Screening</u>. Screening shall be in accordance with method 5004 of MIL-STD-883, and shall be conducted on all devices prior to quality conformance inspection. The following additional criteria shall apply:
  - a. Burn-in test, method 1015 of MIL-STD-883.
    - (1) Test condition A, B, C, or D using the circuit submitted with the certificate of compliance (see 3.6 herein).
    - (2)  $T_A = +125$ °C, minimum.
  - b. Interim and final electrical test parameters shall be as specified in table II herein, except interim electrical parameter tests prior to burn-in are optional at the discretion of the manufacturer.

TABLE II. Electrical test requirements.

   MIL-STD-883 test requirements   	   Subgroups     (per method     5005, table I)
   Interim electrical parameters   (method 5004)	
Final electrical test parameters   (method 5004)	1*, 2, 3, 4,   5, 6, 7
Group A test requirements (method 5005)	1 1, 2, 3, 4, 1 5, 6, 7, 8**
   Group C and D end-point   electrical parameters   (method 5005)	1

<sup>\*</sup>PDA applies to subgroup 1.

<sup>\*\*</sup>Subgroup 8, if not tested, shall be guaranteed to the limits specified in table I herein.

- 4.3 Quality conformance inspection. Quality conformance inspection shall be in accordance with method 5005 of MIL-STD-883 including groups A, B, C, and D inspections. The following additional criteria shall apply.
  - 4.3.1 Group A inspection.
    - a. Tests shall be as specified in table II herein.
    - b. Subgroups 9, 10, and 11 in table I, method 5005 of MIL-STD-883 shall be omitted.
  - 4.3.2 Groups C and D inspections.
    - a. End-point electrical parameters shall be as specified in table II herein.
    - b. Steady-state life test conditions, method 1005 of MIL-STD-883.
      - (1) Test condition A, B, C, or D using the circuit submitted with the certificate of compliance (see 3.6 herein).
      - (2)  $T_A = +125^{\circ}C$ , minimum.
      - (3) Test duration: 1,000 hours, except as permitted by method 1005 of MIL-STD-883.
  - 5. PACKAGING
- 5.1 Packaging requirements. The requirements for packaging shall be in accordance with MIL-M-38510.
  - 6. NOTES
- 6.1 <u>Intended use.</u> Microcircuits conforming to this drawing are intended for use when military specifications do not exist and qualified military devices that will perform the required function are not available for OEM application. When a military specification exists and the product covered by this drawing has been qualified for listing on QPL-38510, the device specified herein will be inactivated and will not be used for new design. The QPL-38510 product shall be the preferred item for all applications.
- 6.2 Replaceability. Microcircuits covered by this drawing will replace the same generic device covered by a contractor-prepared specification or drawing.
- 6.3 Configuration control of SMD's. All proposed changes to existing SMD's will be coordinated with the users of record for the individual documents. This coordination will be accomplished in accordance with MIL-STD-481 using DD Form 1693, Engineering Change Proposal (Short Form).
- 6.4 Record of users. Military and industrial users shall inform Defense Electronics Supply Center when a system application requires configuration control and the applicable SMD. DESC will maintain a record of users and this list will be used for coordination and distribution of changes to the drawings. Users of drawings covering microelectronics devices (FSC 5962) should contact DESC-ECS, telephone (513) 296-6022.
- 6.5 Comments. Comments on this drawing should be directed to DESC-ECS, Dayton, Ohio 45444, or telephone (513) 296-5375.

6.6 Approved source of supply. An approved source of supply is listed in MIL-BUL-103.

Additional sources will be added to MIL-BUL-103 as they become available. The vendor listed in MIL-BUL-103 has agreed to this drawing and a certificate of compliance (see 3.6 herein) has been submitted to and accepted by DESC-ECS. The approved source of supply listed below is for information purposes only and is current only to the date of the last action of this document.
