## Panasonic ideas for life

RoHS Directive compatibility information http://www.nais-e.com/

HIGH SENSIBILITY RELAY
WITH GUARANTEED
LOW LEVEL SWITCHING CAPACITY

## FEATURES

## 1. High contact reliability over a long life has been made possible for low level loads.

Using a low level load ( $1 \mathrm{mV} 10 \mu \mathrm{~A}$ to 10 $\mathrm{V} 10 \mathrm{~mA}) 10^{7}$ operations were achieved with a static contact resistance of Max. $100 \mathrm{~m} \Omega$ (voltage drop of $20 \mathrm{mV}, 1 \mathrm{~mA}, 1$ kHz ) and a dynamic contact resistance of Max. $1 \Omega$ (Measurement delay 10 ms , voltage drop of $20 \mathrm{mV}, 1 \mathrm{~mA}, 1 \mathrm{kHz}$ ).
2. High sensibility of 50 mW By using the highly efficient polar magnetic circuit "seesaw balance armature mechanism", a rated power consumption of 50 mW (for single side stable type) has been achieved.
3. Low thermal electromotive force Reducing the heat from the coil enables a thermal electromotive force of $3 \mu \mathrm{~V}$ or less.

## TYPICAL APPLICATIONS

This relay will be used for the small load for measuring instruments or others where a stable contact resistance is required.

## ORDERING INFORMATION

Note: Tape and reel packing symbol " $-Z$ " is not marked on the relay. " $X$ " type tape and reel packing (picked from $1 / 3 / 4 / 5$-pin side) is also available. Suffix " $X$ " instead of " $Z$ ".
