IF850 850MHz MicroSphere Antenna

850MHZ OMNI-DIRECTIONAL IN-BUILDING ANTENNA

The widespread use of cellular phones and wireless network applications inside buildings has increased the need for antenna systems that can provide considerable gain over traditional dipole antennas. Laird's in-building wireless antennas are particularly applicable in environments where aesthetics and wide angle coverage are necessary for successful wireless deployment. Their surprisingly small size allow the antennas to be hidden almost anywhere, providing an invisible solution for most applications.

FEATURES

- Surprisingly small size allows it to be hidden almost anywhere, providing an invisible solution for many applications.
- The field pattern is toroidal, providing omnidirectional coverage in any plane around the long axis of the antenna, and two lobes in any plane parallel to the long axis.

MARKETS

 The omni-directional pattern is suited to a variety of uses, including handheld devices, inbuilding systems or other applications where mobility is a factor.

Azimuth Plane Cut perpendicular to the antenna, parallel to the connector/cable exit, perpendicular to the polarization

Elevation Plane Cut perpendicular to the antenna, parallel to the connector/cable exit, parallel to the polarization axis

Omni Plane Cut in the plane of the antenna perpendicular to the connector/ cable exit

SPECIFICATIONS			
Element Type		Microstrip	
Frequency Range		806 – 960 MHz	
Peak Gain		3 dBi	
Polarization ¹		Linear	
Impedance		50 ohms	
Maximum Input Power		50 watts	
VSWR (Min. Performance)		2:1	
Dimensions (L x W x H)		11.4 x 8.6 x 0.25 cm	
Housing		Acrylic	
Operating/Storage Temperature		-40º to +70ºC	
MODEL #	REFERENCE #		CONNECTOR
IF850-SF00	CAF95952		SMA Female Panel

MOUNTING OPTIONS

• Includes nylon screws for mounting to ceiling tile or finished ceiling

ANT-DS-IF850 0115
